

Available Blueberry Varieties

Brightwell

Early to mid-season ripening, medium-large berry with sweet flavor and a light blue color. A consistent producer with vigorous, upright growth.

Centurion

Mid to late season ripening. Produces darker color fruit than most rabbiteyes. Good quality berries are medium to large in size.

Climax

Early ripening. Medium size berries, sweet flavor. Upright growth with intense green foliage. One of the very best for harvesting.

Onslow

Vigorous, semi-upright, self fertile plant produces large fruit, mid to late-season.

Powder Blue

Late-season ripening, highly productive with medium to large size sweet fruit, darker blue in color. An upright plant with good foliage.

Premier

Early to mid-season, large fruit. Excellent flavor, light blue in color and good quality. Plants are upright with good foliage. Highly productive.

Southland

Fruit size medium to large and good quality. Ripens mid to late-season. Plant growth is compact and upright with dense foliage.

Tifblue

Early to mid-season ripening. Medium to large light blue, good quality berries. Vigorous upright plants hold up well until last berries are harvested. Rates as the best ornamental for fall leaf color.

Blueberry Varieties

Eight rabbit-eye varieties selected for southern gardens are available in 2 gallon containers.

Rabbiteye Type (-10° to 20°)
Tolerate a wide range of soil and are heat and drought resistant.
